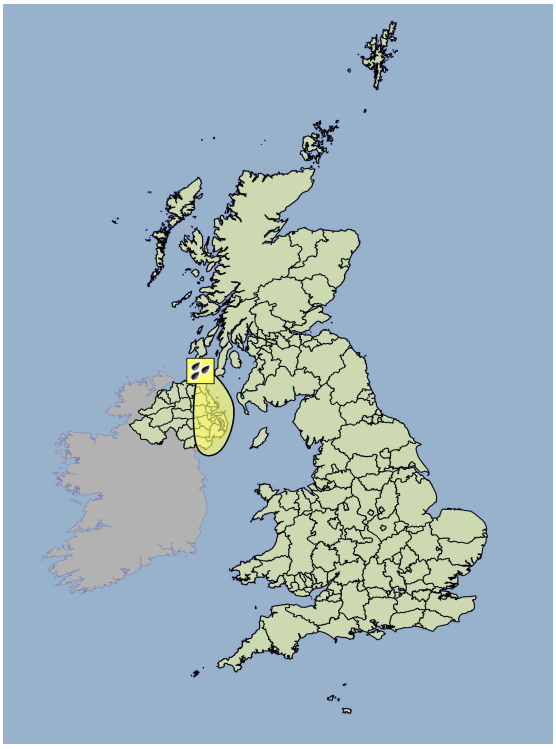
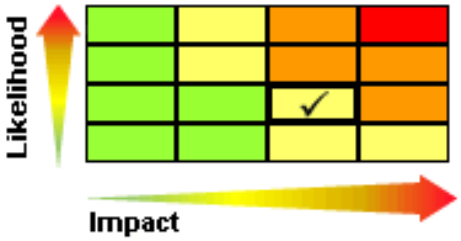
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal wave is expected to move across Northern Ireland later Tuesday night and during Wednesday morning, bringing some heavy rain. Whilst there remains some uncertainty in the exact location of the heaviest rainfall, accumulations of 20-30 mm could be possible quite widely within the warning area, whilst 40 mm is possible in one or two places. This could lead localised surface water flooding. The rain is expected to clear through the first half of Wednesday morning.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **03:00 on Wed, 26th Aug 2015** until **09:00 on Wed, 26th Aug 2015**

An area of heavy rain is expected to move north into eastern areas of Northern Ireland during the early hours of Wednesday. Some local surface water flooding is possible. The rain will clear northeast on Wednesday morning.

The public should be aware that some disruption to transport due to local surface water flooding is possible.
